And in this installment of "they'll make a cachet for anything, good or bad," here's an Andrew Johnson impeachment 100th anniversary cachet! On this date in 1868, after he was impeached, his Senate trial started. He was found not guilty

 A Star Is Born: the Stamp Design Process of Artist Robert McCall

- March-June
- Joint exhibit
 with the
 University of
 Arizona's
 Museum of
 Art

Postage stamp design is part ART. part SCIENCE. part POLITICS. & a lot of HARD WORK.

1. The Stamp Advisory Committee recommends a subject.

> For example, U.S. space programs.

2. The Design Coordinator finds an artist appropriate for the subject.

Such as Steve Dohanos or Don McDowell contacting Robert McCall. 3. The committee may make suggestions to the artist.

> As in Donahos discussing "twin" stamp design with McCall or XXXXX.

UNITED STATES IN SPACE ---- A DECADE OF ACHIEVEMENT

The artist creates one or more concepts for the postage stamp design.

McCall sketched in pencil, drew black and white, and experimented with color. Several theme ideas are jotted down next to images.

Even artists as respected and well-known as McCall are asked to make changes. It is a normal part of the process.

6. The artist creates artwork <u>exactly</u> five times bigger than the actual stamp.

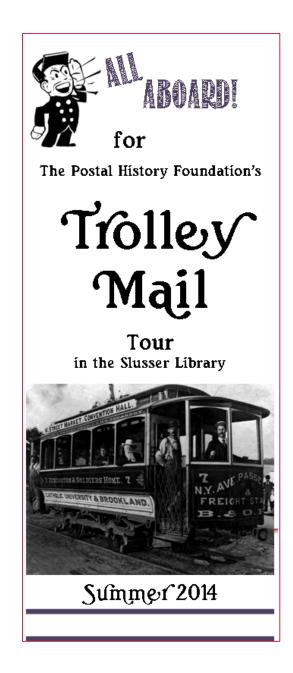

Design, color, and detail must be "shrinkable" to fit appealingly on a postage stamp. The artist will also keep the printing method in mind when selecting color and type and mount of detail in the design.

7. The finished artwork is approved by the committee.

As a famous artist, and because space exploration is popular, McCall was often included in publicity of first day issue.
